Criteria	Not Yet Meeting Expectations	Meets Expectations	Exceeds Expectations
Conduct and compile research about a topic in education	-little or no evidence of valid or current research	- compilation of research shows a clear understanding of the topic	- strategic compilation of research shows insight into the topic
Present research on a topic through a multi-media presentation	-- presentation is unclear, confusing or ineffective in conveying key ideas	- multi-media presentation is complete and effectively conveys the researched material	- multi-media presentation is complete and innovatively showcases the research material
Make reference to the literature on the topic	-links with credible sources are absent or unclear -statements seem based on opinion, rather than evidence	- references to the literature support various aspects of the topic	- references to the literature are used effectively to support all aspects of the topic
Consider critically the topic, e.g. its pros and cons and/or its proponents or critics	- the presentation provides a narrow or one-sided view of the topic	- evidence of critical consideration -various perspectives are considered	- convincing evidence of critical consideration, promoting thoughtful discussion within the group
Prepare and facilitate engagement/discussion among your colleagues	- the presentation does not provide enough background information for thoughtful discussion -only a few audience members are actively engaged	- evidence of preparation and practice - collegial involvement is facilitated, with many audience member participating	- evidence of extensive preparation and practice - collegial involvement is expertly facilitated -audience members are actively engaged, with broad participation
